

TAIWO ALABI

Data Governance & Telecom Analytics

Dublin, Ireland | +353 87 00 42838 | newalabitaibo625@gmail.com | [linkedin.com/in/tami-alabi](https://www.linkedin.com/in/tami-alabi) | iamtamilore.github.io

PROFESSIONAL SUMMARY

Data governance and analytics specialist with hands-on experience in data quality, data classification and controls testing at a telecom operator. Audited 100k+ records for quality and compliance. Supported a validated customer data migration with 440+ User Acceptance Testing (UAT) cases. Delivered operational reporting dashboards tracking 30+ Key Performance Indicators (KPIs). Currently completing an MSc in Artificial Intelligence at National College of Ireland.

SKILLS

- Data classification, data lineage documentation, GDPR data cataloguing, data quality audits, UAT and controls testing, and requirements analysis
- Subscriber metrics (Monthly Active Users, or MAU), operational KPI reporting, CRM analytics, process modelling using BPMN (Business Process Model and Notation), and ticket triage automation
- Power BI, SSRS (SQL Server Reporting Services), Tableau, Microsoft Word, Outlook, and Excel
- SQL, Python ETL (Extract, Transform, Load) automation, PostgreSQL/pgvector, Hadoop HDFS/HBase, GaussDB, BigQuery, Docker, Kubernetes, FastAPI, and Flask
- RAG (Retrieval-Augmented Generation) pipelines, pgvector, FAISS, LangGraph, LLM evaluation, model evaluation with ROC (Receiver Operating Characteristic) and calibration, scikit-learn, TensorFlow, and Keras

EDUCATION

MSc Artificial Intelligence (part-time) - National College of Ireland, Dublin January 2026 - Expected January 2027

BSc Computer Science, Second Class Honours, Upper Division - Afe Babalola University, Lagos September 2021 - June 2025

EXPERIENCE

Data Specialist Huawei Technologies - Globacom Telecommunications Department, Lagos March 2025 - December 2025

- Promoted from Data Analyst Intern after the internship was extended by the team.
- Supported a customer data migration with the solutions architect, classifying records by type and sensitivity.
- Designed 440+ test cases with the test team to validate migration integrity before cutover.
- Documented data handling rules and GDPR-aligned data cataloguing for migrated datasets.
- Profiled, cleaned and validated 100k+ user engagement rows in SQL and fixed a 14% MAU reporting discrepancy.
- Gathered stakeholder requirements and turned them into governed, reusable datasets.
- Owned Power BI reports, dashboards and workspaces.
- Built SSRS and Tableau dashboards tracking 30+ KPIs for departmental operations.
- Automated daily CRM data extraction in Python and saved around 15 hours of manual reporting weekly.
- Designed database tables from 20+ business requirements to support new software systems.

PROJECTS

Customer Care Process Automation - Python, scikit-learn, BPMN 2.0, pandas

- Automated ticket triage for a mobile network's customer care using text classification to route complaints to five teams at 95.2% on held-out tickets.
- Built an escalation gate so tickets scoring under 0.55 confidence route to a human instead of a guess.
- Mapped the existing process in BPMN before automating, then validated records and wrote the daily report to replace two manual processes.

Smart Medical Records Engine - FastAPI, PostgreSQL/pgvector, LangGraph, Docker

- Retrieval system over patient notes that surfaces critical history like prior allergies in seconds.
- Enforced patient scoping at the schema level and tested it against 30 adversarial probes to check for zero leaks.
- Logged every access, stripped personal information before inference, and kept the system on-premise so data never leaves the hospital.

TermsGuard AI - Sentence Transformers, FAISS, Claude API, Flask

- Contributed the retrieval pipeline, GDPR grounding, rule guards and latency reduction to a four-person team project.
- Flags risky clauses in privacy policies grounded in exact source text and cites GDPR articles from a 4,527-chunk index.
- Cut analysis time from 28 seconds to under 10 seconds and fixed how the system handles negation such as we do not sell your data.
