TAIWO ALABI

Data Governance & Telecom Analytics

Dublin, Ireland | +353 87 00 42838 | newalabitaiwo625@gmail.com | linkedin.com/in/tami-alabi | iamtamilore.github.io

Stamp 2 visa - Eligible for Stamp 1G, available to work full-time from March 2027.

PROFILE

Data governance and analytics specialist with hands-on data quality, data classification, and controls testing experience in telecom at Huawei/Globacom. Audited 100k+ records. Supported a migration validated by 440+ UAT cases. Delivered dashboards tracking 30+ operational KPIs. MSc Artificial Intelligence, NCI (January 2027). English (native).

SKILLS

Programming Languages: Python, SQL
Databases: PostgreSQL, pgvector, GaussDB, HBase, Hadoop HDFS, Google BigQuery
Visualisation & Reporting: Power BI, Tableau, SSRS
Data Governance & Quality: Data classification, data lineage documentation, GDPR data cataloguing, data quality audits, UAT / controls testing, BPMN process modelling
Telecom & Business Analytics: Subscriber metrics (MAU), operational KPI reporting, CRM analytics, ticket triage automation
Data Engineering & Infrastructure: Python ETL automation, Docker, Kubernetes, FastAPI, Flask, Google Cloud
AI & Machine Learning: RAG pipelines (pgvector, FAISS), LangGraph, LLM evaluation, model evaluation (ROC, calibration), scikit-learn, TensorFlow/Keras

EXPERIENCE

Data Specialist | Huawei Technologies - Globacom Telecommunications Department, Lagos | March 2025 – December 2025

Progressed from Data Analyst Intern; internship extended by the team.

Data governance & migration

- Supported customer data migration with the solutions architect; classified records by type and sensitivity for auditable migration.
- Designed 440+ UAT cases with the test team, validating migration integrity and data controls before cutover.
- Documented data handling rules and GDPR-aligned data cataloguing for migrated datasets.

Data quality & analytics

- Profiled, cleaned and validated 100k+ user engagement rows in SQL; found and fixed a 14% MAU reporting discrepancy.
- Gathered stakeholder requirements; turned them into governed, reusable datasets and measures.
- Owned Power BI reports, dashboards, workspaces and datasets; added advanced analytics for self-service.

Reporting & automation

- Built SSRS and Tableau dashboards tracking 30+ KPIs across departmental operations.
- Automated daily CRM data extraction in Python; saved ~15 hours of manual reporting weekly.
- Designed database tables from 20+ business requirements; supported rollout of new software systems.

PROJECTS

Customer Care Process Automation - Python, scikit-learn, BPMN 2.0, pandas

- Automated ticket triage for a mobile network's customer care: TF-IDF + Naive Bayes routes complaints to five teams at 95.2% on held-out tickets.
- Designed an escalation gate: tickets scoring under 0.55 confidence route to a human instead. Controls over coverage.
- Mapped the as-is process in BPMN before automating; second bot validates records and writes the daily report. Two manual processes replaced.

Smart Medical Records Engine - FastAPI, PostgreSQL/pgvector, LangGraph, Docker

- Retrieval system over patient notes: surfaces critical history (e.g., prior allergies) in seconds.
- Scoping enforced at schema level: wrong-patient records excluded before ranking, not filtered after. 30 adversarial probes, zero leaks.
- Audit log on every access; PII stripped before inference; on-premise LLM, data never leaves the hospital.

TermsGuard AI - Sentence Transformers, FAISS, Claude API, Flask

- Flags risky clauses in privacy policies, grounded in exact source text; flags cite GDPR articles from a 4,527-chunk index.
- Cut analysis time from 28s to under 10s; fixed negation handling ("we do not sell your data").

EDUCATION

MSc Artificial Intelligence - National College of Ireland, Dublin January 2026 – January 2027

- Focus: AI evaluation and critique - evaluation design, deployment patterns, sliced evaluation, confidence calibration.

BSc Computer Science (2.1) - Afe Babalola University, Lagos September 2021 – February 2025

INTERESTS & ACHIEVEMENTS

- **Filmmaking & Photography Club, NCI - shoot planning, editing, event photography.**
